FAQ

Community Climate Action Plan and Safety Element Community Workshop #1 Summary, February 16, 2023

On Thursday, February 16, from 6–7:30 p.m. a virtual kick-off for the Alameda County Climate Action Plan was held. Thirty-one people at ended the online meeting. The Bilingual Zoom meeting was conducted in Spanish and English with small group discussions. Small-group discussions explored participants' levels of preparedness for the impacts of climate change. Discussion topics included: wildfire and smoke, extreme heat, flooding, and drought. Direct comments from at endees included:

- "Many older people don't have a plan [for extreme heat events] or air conditioning [at home]."
- "Regardless of household [water] conservation efforts, [drought] requires coordinated action by the County and State, [and] even interstate [action]."
- "Dead trees [are a wildfire concern]. [We] need some sort of removal service [and there is] no Tree Board to raise issues to."
- "Flood zone information is outdated or inaccurate and doesn't include climate-related impacts."
- "Many [disaster preparedness] workshops are held in English only. This limit [non-English speakers'] ability to access this information."

The presentation and polls results, as well as the Mural boards created during the breakout room activity, are included below.

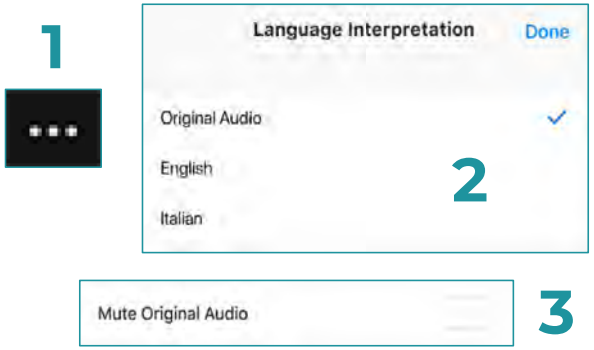
Android | iOS



Zoom

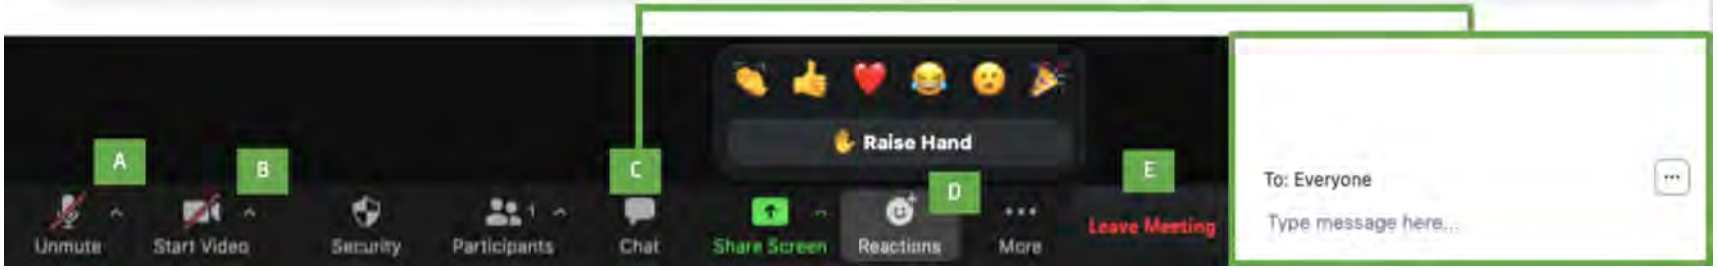
A **Mute / Unmute:** Mutes and unmutes your microphone. Please stay on mute unless you are invited to speak.

B **Start Video / Stop Video:** Turns your camera on and off.

C **Chat:** Opens and closes the chat box. You may leave questions and comments here. We may share notifications or instructions here.

D **Reactions:** Opens menu of non-verbal reactions. We ask that you use the "Raised Hand" feature to notify us when you would like to be called on to speak. can use reactions to provide a reaction to what someone else is saying.

E **Leave Meeting:** Click to leave the meeting while it continues for the other participants. Only the host can end the meeting.



Zoom

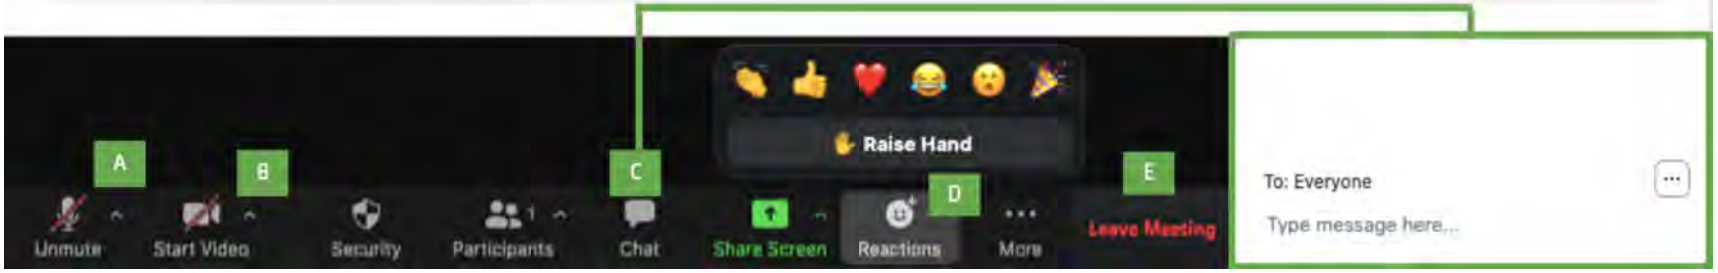
A **Mute (poner en silencio)/Unmute (reactivar sonido)**: desactiva y activa el micrófono de usted. Por favor, manténgase en silencio a menos que se le invite a hablar.

B **Start Video (iniciar video)/Stop Video (detener video)**: enciende y apaga la cámara de usted.

C **Chat**: abre y cierra el cuadro de chat. Usted puede dejar aquí sus preguntas y comentarios. Podemos compartir notificaciones o instrucciones aquí.

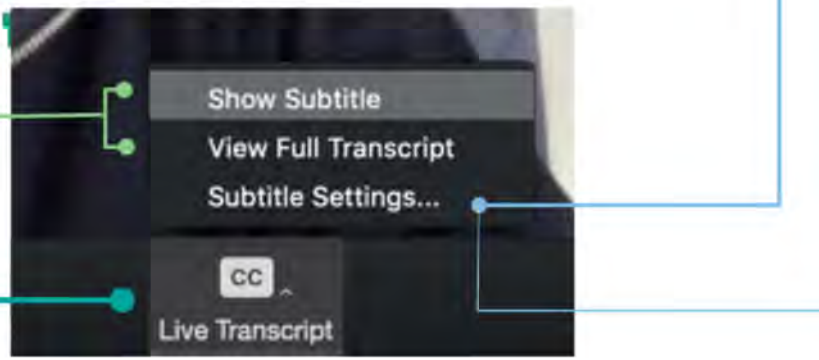
D **Reactions (reacciones)**: abre el menú de reacciones no verbales. Le pedimos que utilice la función 'Raised Hand' (levantar la mano) para notificarnos cuando desee que se le conceda la palabra. Puede utilizar 'Reactions' para reaccionar a lo que dice otra persona.

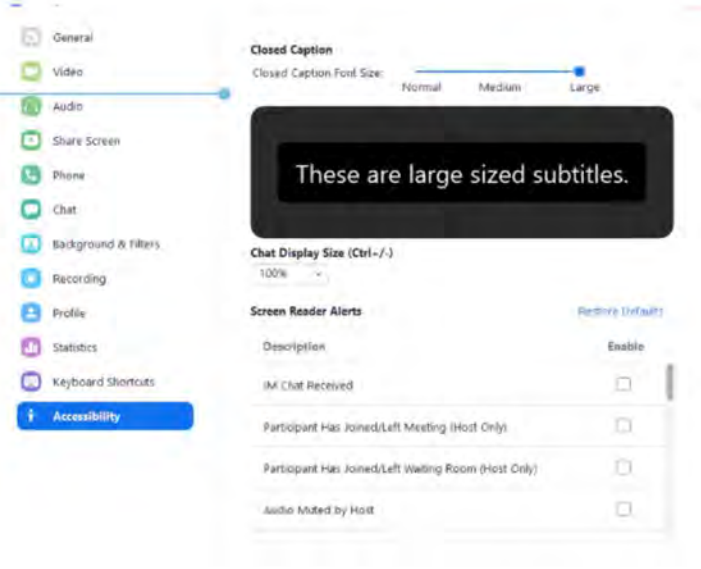
E **Leave Meeting (salir de la reunión)**: haga clic para abandonar la reunión mientras esta continúa para los demás participantes. Únicamente el anfitrión puede dar por terminada la reunión.



Zoom Closed Caption Feature / Función de subtítulos de Zoom

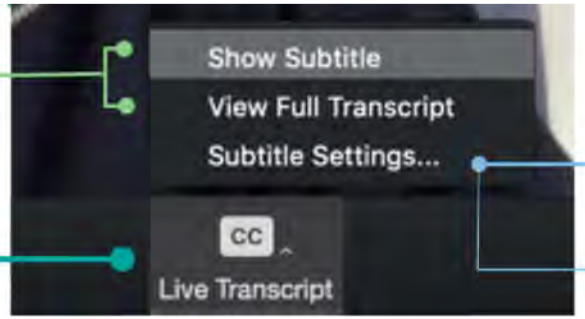
1. Click Live Transcript
2. Click Subtitle and/or View Full Transcript
3. Optional: Click Subtitle Settings to change the text size of the subtitles

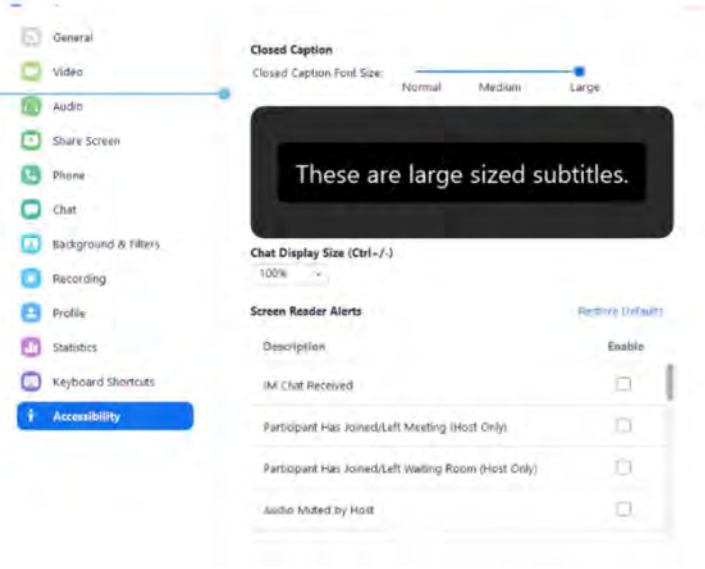




Zoom Closed Caption Feature / Función de subtítulos de Zoom

1. Haga clic en Live Transcript (transcripción en vivo)
2. Haga clic en Subtitle (ver subtítulos) y/o View Full Transcript (ver transcripción completa)
3. Opcional: Haga clic en Subtitle Settings (ajustes de los subtítulos) para cambiar el tamaño del texto de los subtítulos





Land Acknowledgement / Reconocimiento de Tierras

We want to take a moment to acknowledge the sacred land on which we perform activities every day, including this meeting tonight. We offer an expression of gratitude to those who have served as stewards of the land from the beginning. We acknowledge the land, the history, and the presence of the Ohlone people whose connection to this land still exist, who still live in our communities and to whom this land belongs.

As we gather this evening, as part of our effort to bring in equity, we look back in this moment to look forward in our work to correct the harms of the past and to preserve communities.

We stand in solidarity with all indigenous people and their right to self-determination and justice. We commit to working toward the healing of the generational trauma, theft, and dispossession native peoples' have faced and continue to face.

Queremos tomar un momento para reconocer la tierra sagrada en la que realizamos actividades todos los días, incluida esta reunión de esta noche. Ofrecemos una expresión de gratitud a aquellos que han servido como mayordomos de la tierra desde el principio. Reconocemos la tierra, la historia y la presencia del pueblo Ohlone cuya conexión con esta tierra aún existe, que aún vive en nuestras comunidades y a quien pertenece esta tierra.

Mientras nos reunimos esta noche, como parte de nuestro esfuerzo por generar equidad, miramos hacia atrás en este momento para mirar hacia adelante en nuestro trabajo para corregir los daños del pasado y preservar las comunidades.

Nos solidarizamos con todos los pueblos indígenas y su derecho a la autodeterminación y la justicia. Nos comprometemos a trabajar por la sanación del trauma generacional, el robo y el despojo que los pueblos originarios han enfrentado y continúan enfrentando.

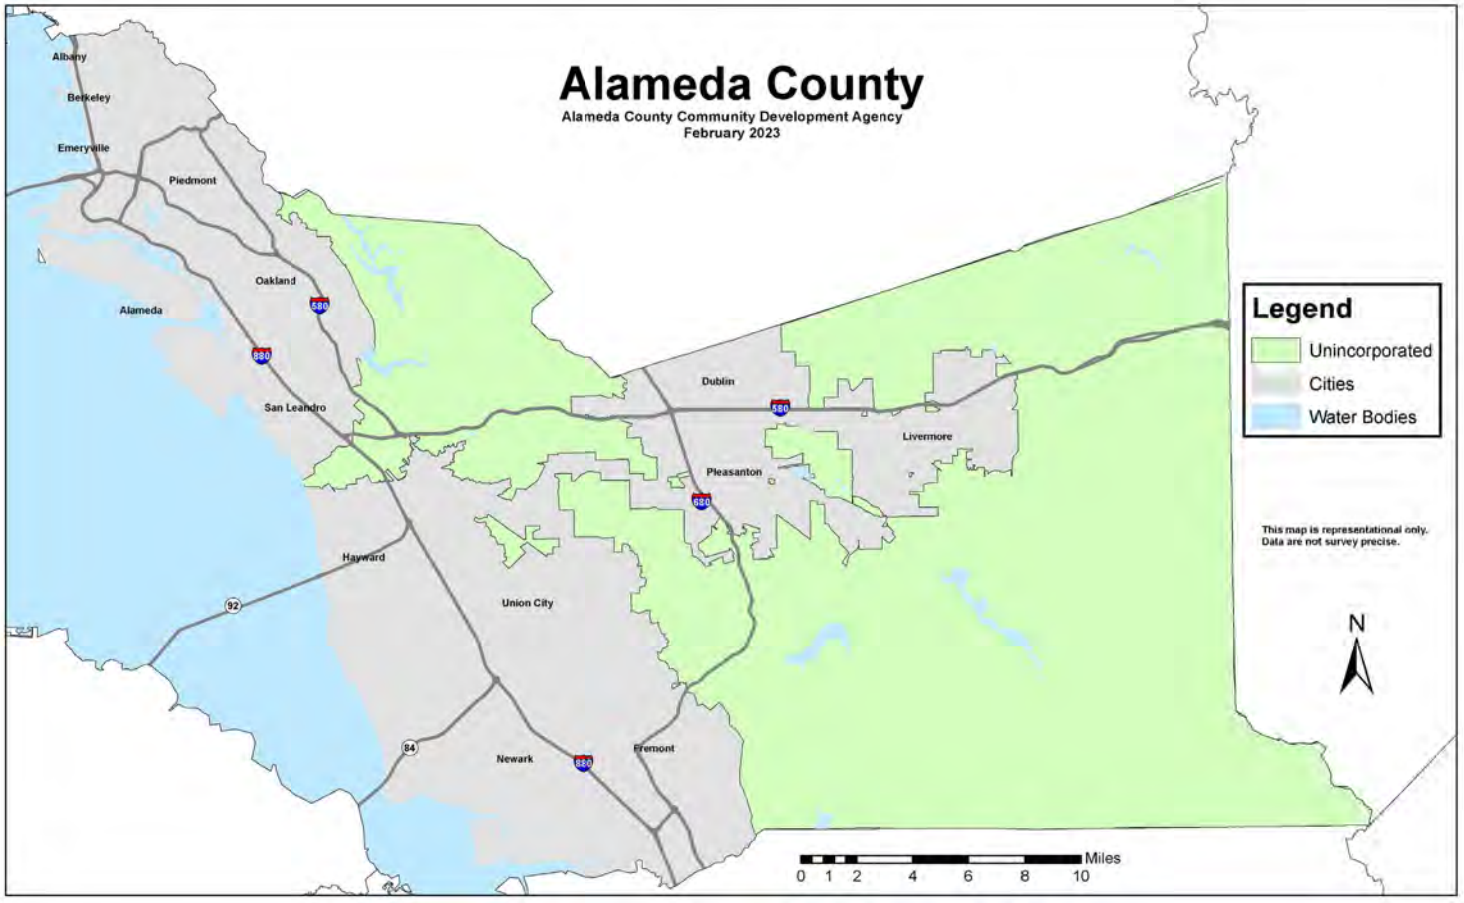
Community Climate Action Plan & Safety Element Overview

Panorama general del Plan de Acción Climática de la Comunidad y el Elemento de Seguridad

Unincorporated Alameda County / Áreas no incorporadas del condado de Alameda



Key Terms / Términos clave

- **Climate Change :** Long-term disruptions in Earth's climate system (e.g., increasing temperatures, changing weather patterns) driven by greenhouse gas emissions, which are caused by burning fossil fuels.
- **Cambio climático:** Alteraciones a largo plazo en el sistema climático de la Tierra (por ejemplo, aumento de las temperaturas, cambios en los patrones meteorológicos) provocadas por las emisiones de gases de efecto invernadero, a su vez causadas por la quema de combustibles fósiles.

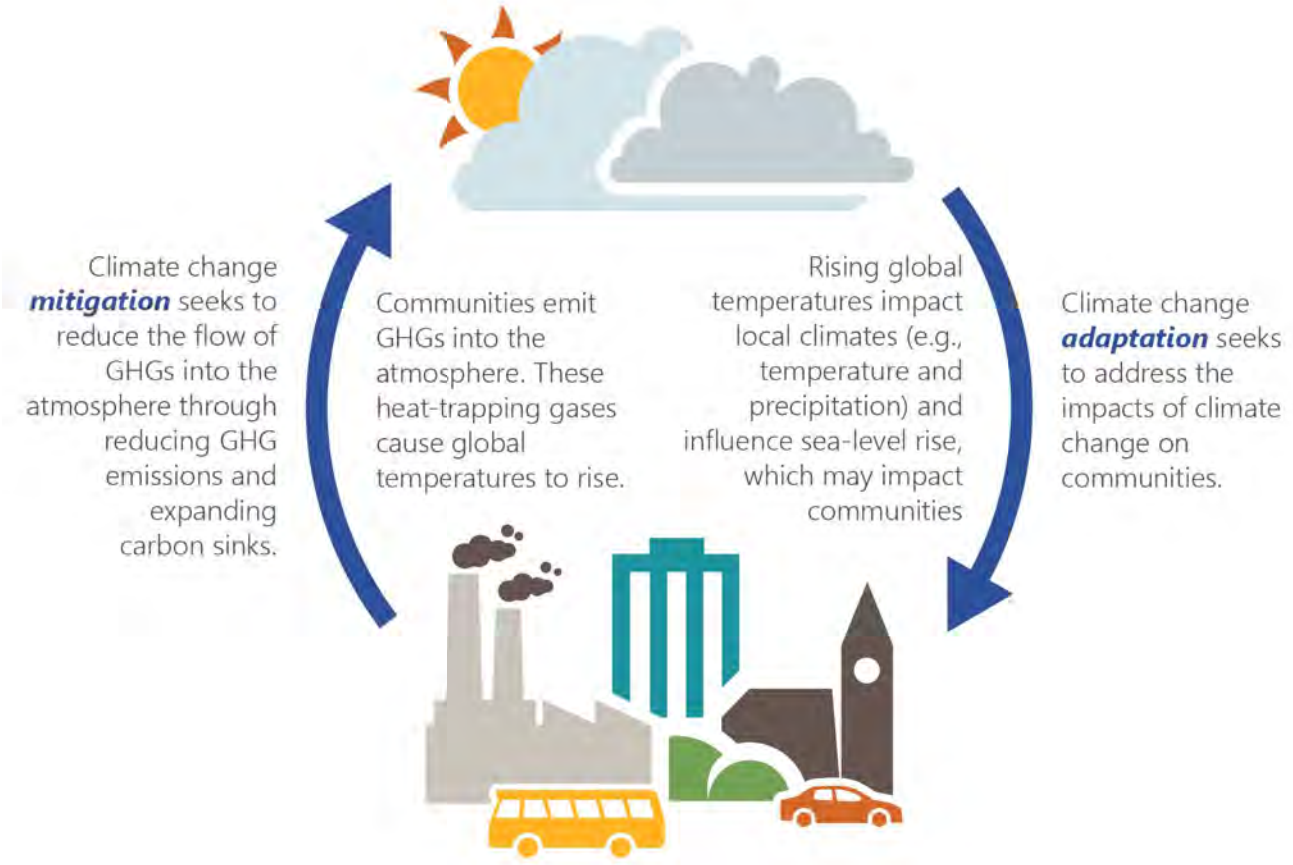
Key Terms / Términos clave

- **Resilience:** The capacity of individuals, communities, institutions, businesses, and systems to survive, adapt, and thrive in the face of climate change.
- **Resiliencia:** La capacidad de las personas, las comunidades, las instituciones, las empresas y los sistemas para sobrevivir, adaptarse y prosperar ante al cambio climático.
- **Vulnerability:** The degree to which populations, the natural and built environment, and community functions are at risk from the potential impacts of climate change.
- **Vulnerabilidad:** El grado en que las poblaciones, el entorno natural y el construido, y las funciones de la comunidad están en riesgo por los impactos potenciales del cambio climático.

Key Terms / Términos clave

- **Adaptation:** Preparing for and adjusting to both current and future potential impacts of climate change.
- **Adaptación:** Prepararse y adaptarse a las posibles repercusiones actuales y futuras del cambio climático.
- **Mitigation:** Targeting the source of climate change by reducing the flow of greenhouse gases into the atmosphere, primarily through reducing human-produced greenhouse gas emissions.
- **Mitigación:** Atacar el origen del cambio climático reduciendo el flujo de gases de efecto invernadero a la atmósfera, principalmente mediante la reducción de las emisiones de gases de efecto invernadero producidas por el hombre.

Climate Mitigation vs. Adaptation / Mitigación del cambio climático frente a la adaptación



GHG = greenhouse gas

Climate Mitigation vs. Adaptation / Mitigación del cambio climático frente a la adaptación

La ***mitigación*** del cambio climático busca reducir el flujo de GEI a la atmósfera mediante la reducción de las emisiones de GEI y la ampliación de los sumideros de carbono.

Las comunidades emiten GEI a la atmósfera. Estos gases que atrapan el calor provocan un aumento de las temperaturas a nivel global.

El aumento de las temperaturas globales repercute en los climas locales (por ejemplo, en la temperatura y las precipitaciones) e influye en la subida del nivel del mar, lo que puede tener un fuerte impacto en las comunidades.

La **adaptación** al cambio climático busca hacer frente a sus efectos en las comunidades.

GEI = gases de efecto invernadero

What is the Community Climate Action Plan (CCAP)? / ¿Qué es el Plan de Acción Climática de la Comunidad (CCAP, por sus siglas en inglés)?

- A **roadmap** for reducing greenhouse gas emissions and adapting to climate change.
- Es una **guía** para reducir las emisiones de gases de efecto invernadero y adaptarse al cambio climático.
- Identifies **existing and projected** greenhouse gas emissions.
- Identifica las emisiones de gases de efecto invernadero **existentes y previstas.**
- Sets greenhouse gas **reduction targets.**
- Establece **objetivos de reducción de** gases de efecto invernadero.

What is the Community Climate Action Plan (CCAP)? / ¿Qué es el Plan de Acción Climática de la Comunidad (CCAP, por sus siglas en inglés)?

- Establishes **policies and actions** to meet greenhouse gas reduction targets.
- Establece **políticas y acciones** para cumplir los objetivos de reducción de gases de efecto invernadero.
- Integrates **climate adaptation** and resilience strategies.
- Integra las estrategias de **adaptación cimática** y de resiliencia.
- Engages the **community**.
- Estimula la participación de la **comunidad**.
- Provides an **implementation program.**
- Proporciona un **programa de implementación.**

CCAP Objectives / Objetivos del plan CCAP

- **Greenhouse Gas Reduction / Reducir los gases de efecto invernadero**
  - Align with statewide reduction targets. Alineación con los objetivos de reducción a escala estatal.
- **Climate Resilience / Resiliencia climática**
  - Integrate climate adaptation. Integrar la adaptación cimática.
- **Community / Comunidad**
  - Engage and empower our community. Convocar y capacitar a nuestra comunidad.
- **Sustainability / Sustentabilidad**
  - Connect County's existing and developing sustainability efforts. Conectar los esfuerzos de sustentabilidad existentes y en desarrollo del Condado.
- **Communication / Comunicación**
  - Communicate climate challenges and opportunities. Comunicar los retos y las oportunidades con respecto al clima.
- **Implementation / Implementación**
  - Focus on prioritization and implementation. Centrarse en la priorización y la implementació.

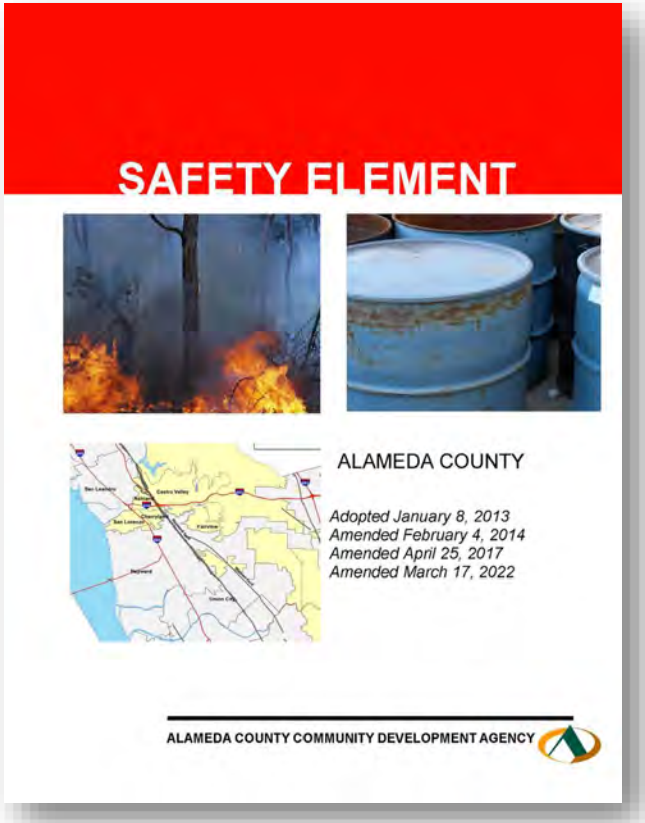
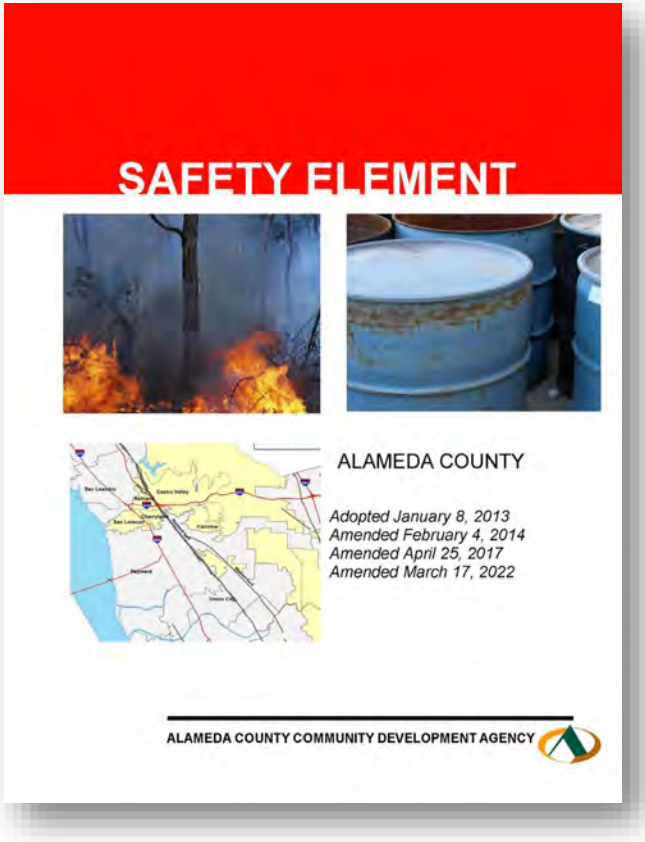
What is the Safety Element? / ¿Qué es el Elemento de seguridad?

- A **required element** of the General Plan to provide community protection.
- Es **un elemento obligatorio** del Plan general de protección comunitaria.
- Complements the **Local Hazard Mitigation Plan.**
- Complementa al **Plan de Mitigación de Riesgos Locales.**
- Identifies **existing and projected** hazards.
- Identifica **los peligros existentes y previstos.**
- **Minimizes** human injury, loss of life, property damage, economic/social dislocation.
- **Minimiza** las lesiones humanas, la pérdida de vidas, los daños materiales y los trastornos económicos y sociales.



What is the Safety Element? / ¿Qué es el Elemento de seguridad?

- Includes **hazard and risk reduction** strategies.
- Incluye estrategias de **reducción de peligros y riesgos.**
- Addresses **evacuation routes.**
- Aborda las **rutas de evacuación.**
- Integrates **climate change vulnerabilities.**
- Integra **las vulnerabilidades ante el cambio climático**.
- Provides goals, policies, objectives, and **implementation measures.**
- Proporciona metas, políticas, objetivos y **medidas de implementación.**



Project Overview / Panorama general del proyecto

- Develop CCAP and SE updates in **parallel.** Desarrollar información actualizada sobre CCAP y de SE (SFPUC) en **paralelo.**
- Update SE with **new state requirements.** Actualizar SE con **los nuevos requisitos estatales.**
- Conduct extensive and diverse **community engagement** through process. Lograr una participación amplia y diversa **de la comunidad** a lo largo del proceso.
- Incorporate **environmental justice** policies. Incorporar políticas **de justicia ambiental.**
- Prioritize policies and programs that **enhance equity.** Dar prioridad a políticas y programas que **fomenten la equidad.**
- **Collaborate** with community-based organizations, community groups, and neighborhood associations. **Colaborar** con organizaciones con sede en la comunidad, grupos comunitarios y asociaciones de vecinos.

Questions? ¿Tiene alguna pregunta?

Type in the chat or raise your hand. Escriba en el chat o levante la mano.

Breakout Groups / Grupos pequeños

- **Objective:** Understand if residents feel prepared for climate hazards.
- **Objetivo:** Saber si los residentes se sienten preparados para los peligros climáticos.
- All groups will discuss how prepared individuals feel about each climate hazard. Todos los grupos debatirán sobre cuán preparadas se sienten las personas ante cada peligro climático:
  - Wildfire (Incendios forestales)
  - Extreme Heat (Calor extremo)
  - Flooding (Inundaciones)
  - Drought (Sequía)
- Participate by adding sticky notes to the Mural board. Participe añadiendo notas adhesivas al tablón mural.

Breakout Groups / Grupos pequeños

Extreme Heat

How prepared do you feel to deal with the impacts of this climate hazard?

Not Prepared | Somewhat Prepared | Fully Prepared

What makes you feel prepared?

In what ways do you feel unprepared?

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.

Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard,and place them under the respective question.

Breakout Groups / Grupos pequeños

Calor extremo

¿Cuán preparado/a se siente para hacer frente a los efectos de este peligro climático?

No preparado/a | Algo preparado/a | Totalmente preparado/a

¿Qué le hace sentirse preparado/a?

¿En qué aspectos se siente no preparado/a?

Por favor coloque un punto azul en la escala donde mejor usted se sienta preparado para hacer frente al peligro climático.

Por favor llene en las notas adhesivas que aparecen a continuación de como si o no se siente preparado para hacer frente al peligro climático, y colóquelas debajo de su pregunta respectiva.

Breakout Groups Code of Conduct / Código de conducta de los grupos pequeños

- Be here now.
- One speaker at a time.
- "Step up" to voice your thoughts.
- "Step back" to let others speak too.
- Be additive, not repetitive. Listen actively (seek to understand, keep an open mind).
- Help the facilitator to keep things on time.
- Please raise your hand if you need to be added to the Spanish breakout group.

- Viva el momento.
- Una sola persona habla a la vez.
- "Dé un paso al frente" para expresarse.
- "Retroceda" para dejar hablar también a los demás.
- Sea aditivo, no repetitivo.
- Escuche activamente (trate de comprender, mantenga la mente abierta).
- Ayude al moderador a cumplir los plazos.
- Por favor, levante la mano si necesita ser agregado al grupo pequeño español.

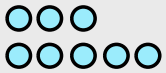
Breakout Group 1

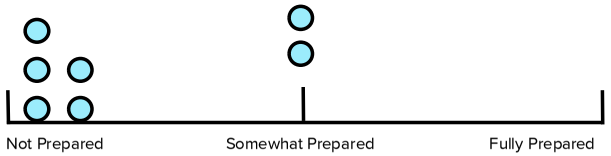
Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.



Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard,and place them under the respective question.

Wildfire

How prepared do you feel to deal with the impacts of this climate hazard?



What makes you feel prepared?

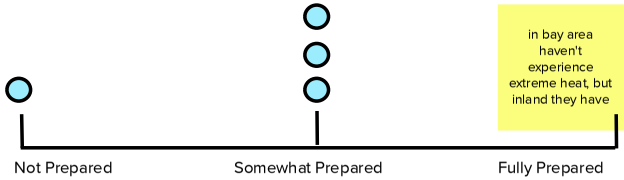
- backpack in case of emergency
- In Castro Valley don't feel it's a threat except for smoke
- have evacuation plan and have offered training for residents
- backpack w/ water, making sure there is fuel in car
- have own gravity shed water storage system

In what ways do you feel unprepared?

- need to know evacuation routes
- lack of fire insurance is concern - people's policies getting cancelled frequently
- concerns re: undeveloped / brushy areas, have to take care of it in summer
- concerns esp. with proximity to Lake Chabot

Extreme Heat

How prepared do you feel to deal with the impacts of this climate hazard?



- in bay area haven't experience extreme heat, but inland they have

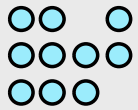
What makes you feel prepared?

- feel prepared in home: Trees + ceiling fans, closing/opening drapes
- house is well-insulated, as long as there is cool evening it's ok
- electrifying house - removing gas furnace, but unsure if this will help extreme heat
- house and backup generator system

In what ways do you feel unprepared?

- county's anti-tree ordinance
- the more people w/ AC, the more
- slow downs with public transit
- most people don't have AC, it often doesn't cool down at night in extreme heat
- concerns for cattle w/o shade, esp. for young calves
- lack of cell service in sunol
- lack of trees - still are brown from last year
- many older people don't have a plan or AC

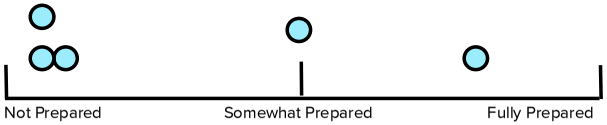
Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.



Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard,and place them under the respective question.

Flooding

How prepared do you feel to deal with the impacts of this climate hazard?



What makes you feel prepared?

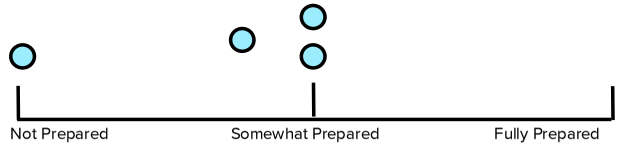
- vegetation in yard soaks it in
- does not seem as much as threat on hayward/castro valley border
- not as many individual home concerns
- no big trees to fall over, however this is concern in other areas

In what ways do you feel unprepared?

- everyone on septic system, unsure what to do when floods
- caltrans unresponsive to clearing debris
- dublin increase in housing causing more run off - creating issues downstream
- crow canyon road - freeways damaged recently, infrastructure/ transit threatened
- loosening of soil from heavy rain
- redwood road fell apart, road closures are bad
- soil erosion / road damage
- do we know ahead of time where roads may be damaged? was damage location predicted?

Drought

How prepared do you feel to deal with the impacts of this climate hazard?



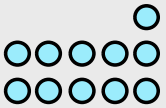
What makes you feel prepared?

- grew up with well access, continue to use this
- native plants in yard
- wells for house / cattle
- greywater training / resources

In what ways do you feel unprepared?

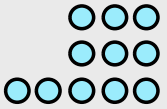
- only so much individual action possible - county/state action needed
- there are many ways to recycle water -need more statewide
- concern about need to buy water from elsewhere
- need water for grass to feed cattle - need to buy alternatives when it runs out
- many oaks are already bare branches - concern re: more tree loss
- this is major threat - despite native plant gardening efforts, many still have water intensive lawns
- work with EBMUD for more education
- people still buy plastic water bottles
- hope for education from county re: how critical water is
- this is one of our biggest problems
- regardless of household conservation efforts, requires coordinated action by county/ state/even interstate
- there's nothing you can do about lack of water, handled poorly historically

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.



Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard,and place them under the respective question.

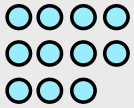
Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.



Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard,and place them under the respective question.

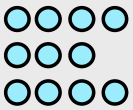
Breakout Group 2

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.



Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard,and place them under the respective question.

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.



Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard,and place them under the respective question.

Wildfire

How prepared do you feel to deal with the impacts of this climate hazard?

What makes you feel prepared?

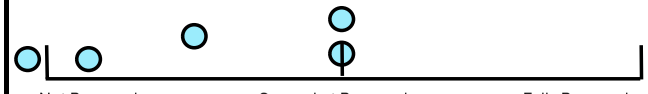
- Utility companies undergrounding utility lines
- Removing overgrown vegetation
- Effective mitigation already in place and planned
- More investments in fire fighting
- Last summer impacts were less than previous summer

In what ways do you feel unprepared?

- More intense wildfires
- No control over smoke impacts
- Preparing children in addition to yourself

Extreme Heat

How prepared do you feel to deal with the impacts of this climate hazard?



What makes you feel prepared?

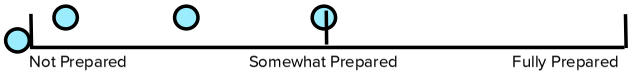
- Has a generator, works in air conditioned building

In what ways do you feel unprepared?

- Uncertainty of future extreme weather events
- You don't know where extreme heat will catch you
- Cost of electricity for increased A/C

Flooding

How prepared do you feel to deal with the impacts of this climate hazard?



What makes you feel prepared?

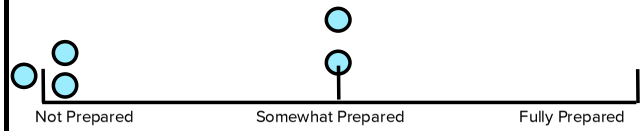
- Having financial means to evacuate
- Education

In what ways do you feel unprepared?

- More atmospheric storms
- How to deal with sea level rise?
- How do we evacuate and relocate?
- Lack of maintenance of streams and trees (by gov't)
- Sewer impacts everyone
- Electricity outages without generators to power essential equipment
- Transportation impacted by flooding
- Need both means and notification to evacuate
- Flood zone information is outdated or inaccurate (and doesn't include climate-related impacts)

Drought

How prepared do you feel to deal with the impacts of this climate hazard?

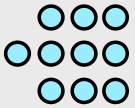


What makes you feel prepared?

In what ways do you feel unprepared?

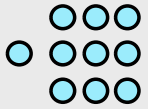
- How can you prepare?
- Too much waiting before taking action (e.g., Utah, Arizona)
- Individual actions don't feel big enough to make a difference

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.



Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard,and place them under the respective question.

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.



Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard,and place them under the respective question.

Breakout Group 3

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.

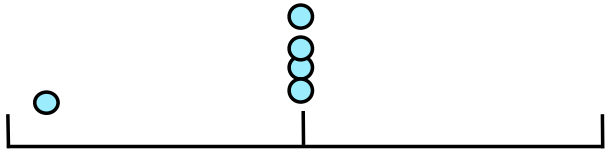
Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard,and place them under the respective question.

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.

Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard,and place them under the respective question.

Wildfire

How prepared do you feel to deal with the impacts of this climate hazard?



What makes you feel prepared?

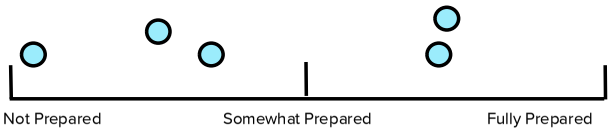
- Redwood forest in back yard that keeps temperatures cooler and don't burn easily.
- Sealed house, safe place to breathe. N95 masks when outside.
- Air filtration system in house. Work has limited air filtration
- Near high fire area. Fire inspector said vegetation well-manage (good way to protect house)
- Could bike out in event of exacution
- N95 masks are great

In what ways do you feel unprepared?

- Traffic will be extremely congested, could get stuck
- Water pressure is terrible in unincorporated areas
- Dead trees. Need some sort of removal service. No tree board to raise issues too
- Urban fires because of encampment activity

Extreme Heat

How prepared do you feel to deal with the impacts of this climate hazard?



What makes you feel prepared?

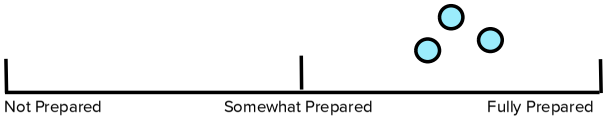
- House is protected from this.
- More cooling centers would be helpful

In what ways do you feel unprepared?

- Grid reliability could be issue
- Very little tree cover. This will increase heat related deaths
- Took too long to open cooling center during extreme heat in 2022
- Not enough outreach from county about how to be prepared for extreme heat events
- Average citizen cant afford or take the time to install HVAC in houses (need more support from county)
- No HVAC in house
- No insulation buffer in roof (no attics)
- When hot, there's often fire so you cant go outside

Flooding

How prepared do you feel to deal with the impacts of this climate hazard?



What makes you feel prepared?

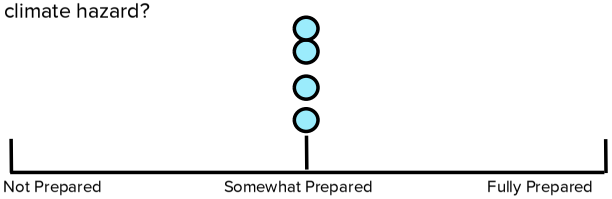
- Elevated houses are fine
- Urban areas seem better protected
- San Lorezno Creek didn't flood significantly during January storms

In what ways do you feel unprepared?

- Folks near creeks having issues. No planning from flood control (need solutions)
- Flood control didn't come to Cherryland Community Association
- Flood control never came back to community to ask for increase in funding (not sure they are adequately funded)
- Not much protection fro San Lorenzo Creek should flood
- Flood control sometimes exacerbates creek floodin (conducted cleanup that removed plant life along creek banks)

Drought

How prepared do you feel to deal with the impacts of this climate hazard?



What makes you feel prepared?

- Rain barrel collection Low-flow appliances
- Backup water in household

In what ways do you feel unprepared?

- Long term problem (need planning)
- Tri-Valley is reliant on groundwater (PFAS concerns)
- removing more trees to build housing
- More housing in arid environment drains water sources
- Will impact us in so many ways - Trout could be impacted in San Lorenzo creek system
- Please dont cut down trees Ruby Meadow (moratorium on Eden Housing project)
- At mercy of powers that be. Community members are reliant upon gonverment

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.

Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard,and place them under the respective question.

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.

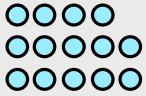
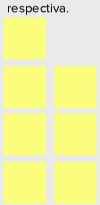
Por favor coloque un punto azul en la escala donde major usted se sienta preparado para hacer frente al peligro climático.



Por favor llene en las notas adhesivas que aparecen a continuación de como si o no se siente preparado para hacer frente al peligro climático, y colóquelas debajo de su pregunta respectiva.

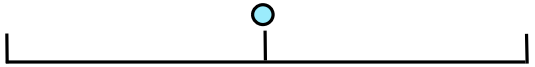


Por favor coloque un punto azul en la escala donde major usted se sienta preparado para hacer frente al peligro climático.

Por favor llene en las notas adhesivas que aparecen a continuación de como si o no se siente preparado para hacer frente al peligro climático, y colóquelas debajo de su pregunta respectiva.

Incendios forestales (Wildfire)

¿Cuán preparado/a se siente para hacer frente a los efectos de este peligro climático? (How prepared do you feel to deal with the impacts of this climate hazard?)



¿Qué le hace sentirse preparado/a? (What makes you feel prepared?)

- What I've learned in workshops has helped me feel prepared

¿En qué aspectos se siente no preparado/a? (In what ways do you feel unprepared?)

- It hasn't happened yet, so I haven't put anything into practice
- When people have experienced these hazards, they're more prepared. I would like to be prepared
- More public workshops-- I've done workshops on earthquakes, but I want to become versed in other disasters
- I work as a community volunteer and workshops would help me transmit this knowledge to community

Calor extremo (Extreme Heat)

¿Cuán preparado/a se siente para hacer frente a los efectos de este peligro climático? (How prepared do you feel to deal with the impacts of this climate hazard?)

¿Qué le hace sentirse preparado/a? (What makes you feel prepared?)

- Workshops to help prepare, reading the news, about how to take care of things in extreme heat, what to do, what not to do
- Heat and earthquakes are disasters we hear about in the news

¿En qué aspectos se siente no preparado/a? (In what ways do you feel unprepared?)

- People who don't have AC or access to an air conditioned space - I don't have that issue
- Some people in community have issues with no AC

Inundaciones (Flooding)

¿Cuán preparado/a se siente para hacer frente a los efectos de este peligro climático? (How prepared do you feel to deal with the impacts of this climate hazard?)

¿Qué le hace sentirse preparado/a? (What makes you feel prepared?)

- As with fires, officials will tell you you need to evacuate, and that's what you need to do
- I know the identifying personal documents/ medication/ items that you need to take with you
- Grabbing important documents might be the last thing you think about
- learned about "go bags" in an earthquake preparation workshop

¿En qué aspectos se siente no preparado/a? (In what ways do you feel unprepared?)

- I have knowledge about what to do but I've never had to apply it
- I don't know if the go bag would be the same used for flooding

Sequía (Drought)

¿Cuán preparado/a se siente para hacer frente a los efectos de este peligro climático? (How prepared do you feel to deal with the impacts of this climate hazard?)

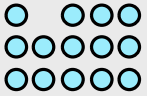
¿Qué le hace sentirse preparado/a? (What makes you feel prepared?)

- I know that you need to be prepared with water and food
- Some workshops talk about preparing for drought – the need to conserve water

¿En qué aspectos se siente no preparado/a? (In what ways do you feel unprepared?)

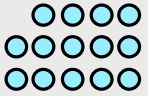
- I worry that I wouldn't be prepared for what I would need in this situation
- We need more preparation/information because we don't hear about this as much in the news or from local government
- Many workshops are only in English. Many people in the Latino community don't know English -- impacts ability to access workshop

Por favor coloque un punto azul en la escala donde major usted se sienta preparado para hacer frente al peligro climático.



Por favor llene en las notas adhesivas que aparecen a continuación de como si o no se siente preparado para hacer frente al peligro climático, y colóquelas debajo de su pregunta respectiva.

Por favor coloque un punto azul en la escala donde major usted se sienta preparado para hacer frente al peligro climático.



Por favor llene en las notas adhesivas que aparecen a continuación de como si o no se siente preparado para hacer frente al peligro climático, y colóquelas debajo de su pregunta respectiva.

Which of these 5 (4 climate hazards & earthquake) worries you the most? Earthquakes, because I live in California. They're all destructive but earthquakes really engender panic

Also concerned about earthquakes-- community is very scared about this

I want to take more disaster preparedness workshops to refresh my memory! and bring more people so that they also know.

Combined disaster preparedness workshops (climate flood, fire, drought & earthquake) -- this would be of interest to community because we need to educate ourselves about how to act in these situations

Community Climate Action Plan and Safety Element Community Workshop #2 Summary, June 15, 2023

On Thursday, June 15, from 6–7 p.m. a virtual meeting was held for the Alameda County Climate Action Plan. Seven people at ended the online community meeting. The Bilingual Zoom meeting was conducted in Spanish and English. Participants were asked questions about their level of preparedness for the impacts of climate change and answered each question via a poll. Questions included natural hazards, personal countywide impacts participants have felt, and what barriers attendees felt inhibited them from participating in climate action. Direct comments from atendees included:

- "I see the choice under land use of evaluating parking needs and considering using vacant lots for parking. How about offering the choice to residents of considering not paving vacant lots and using them for greenhouse gas purification and clean oxygen production, e.g., environmental protection forests (Miyawaki Forests)?"
- "What do I need to do NOW to move a ball?"

The presentation and poll results from the meeting are included below.

Land Acknowledgement / Reconocimiento de Tierras

We want to take a moment to acknowledge the sacred land on which we perform activities every day, including this meeting tonight. We offer an expression of gratitude to those who have served as stewards of the land from the beginning. We acknowledge the land, the history, and the presence of the Ohlone people whose connection to this land still exist, who still live in our communities and to whom this land belongs.

As we gather this evening, as part of our effort to bring in equity, we look back in this moment to look forward in our work to correct the harms of the past and to preserve communities.

We stand in solidarity with all indigenous people and their right to self-determination and justice. We commit to working toward the healing of the generational trauma, theft, and dispossession native peoples' have faced and continue to face.

Queremos tomar un momento para reconocer la tierra sagrada en la que realizamos actividades todos los días, incluida esta reunión de esta noche. Ofrecemos una expresión de gratitud a aquellos que han servido como mayordomos de la tierra desde el principio. Reconocemos la tierra, la historia y la presencia del pueblo Ohlone cuya conexión con esta tierra aún existe, que aún vive en nuestras comunidades y a quien pertenece esta tierra.

Mientras nos reunimos esta noche, como parte de nuestro esfuerzo por generar equidad, miramos hacia atrás en este momento para mirar hacia adelante en nuestro trabajo para corregir los daños del pasado y preservar las comunidades.

Nos solidarizamos con todos los pueblos indígenas y su derecho a la autodeterminación y la justicia. Nos comprometemos a trabajar por la sanación del trauma generacional, el robo y el despojo que los pueblos originarios han enfrentado y continúan enfrentando.

- Planning Commission, September 19, 2022
- Edan MAC, September 13, 2022
- Fairview MAC, September 6, 2022
- Castro Valley MAC, August 8, 2022
- Board Unincorporated Services Commit ee, July 27, 2022

Alameda County Community Climate Action Plan and Safety Element Update

Frequently Asked Questions

What is the Community Climate Action Plan?

The Community Climate Action Plan (CCAP) is a roadmap for reducing greenhouse gas emissions and adapting to the effects of climate change.

What is the Safety Element?

The Safety Element is part of the Alameda County General Plan that identifies hazards and includes strategies to reduce and manage the risks posed by those hazards.

Why is Alameda County developing the CCAP and Safety Element Update?

Alameda County's first CCAP was approved in 2014 and focused on reducing greenhouse gas emissions by 15% below 2005 levels by 2020. The State of California has adopted longer-term targets such as reducing greenhouse gas emissions 40% below 1990 levels by 2030 and achieving carbon neutrality by 2045. This update to the CCAP will align with these state goals and provide a holistic climate action approach to both reduce greenhouse gas emissions and adapt to the impacts of climate change.

Since the last Safety Element was adopted in 2017, there have been legislative requirements that enhance what local governments need to include in their Safety Elements. This update to the Safety Element will address those legal requirements, which focus on climate adaptation and resilience and identifying emergency evacuation routes. The County is preparing these documents in parallel to make sure they are consistent.

Does the CCAP include the cities in Alameda County?

No. This CCAP only includes the unincorporated areas of Alameda County. Many of the cities within Alameda County have prepared their own climate action plans, or are in process of doing so.

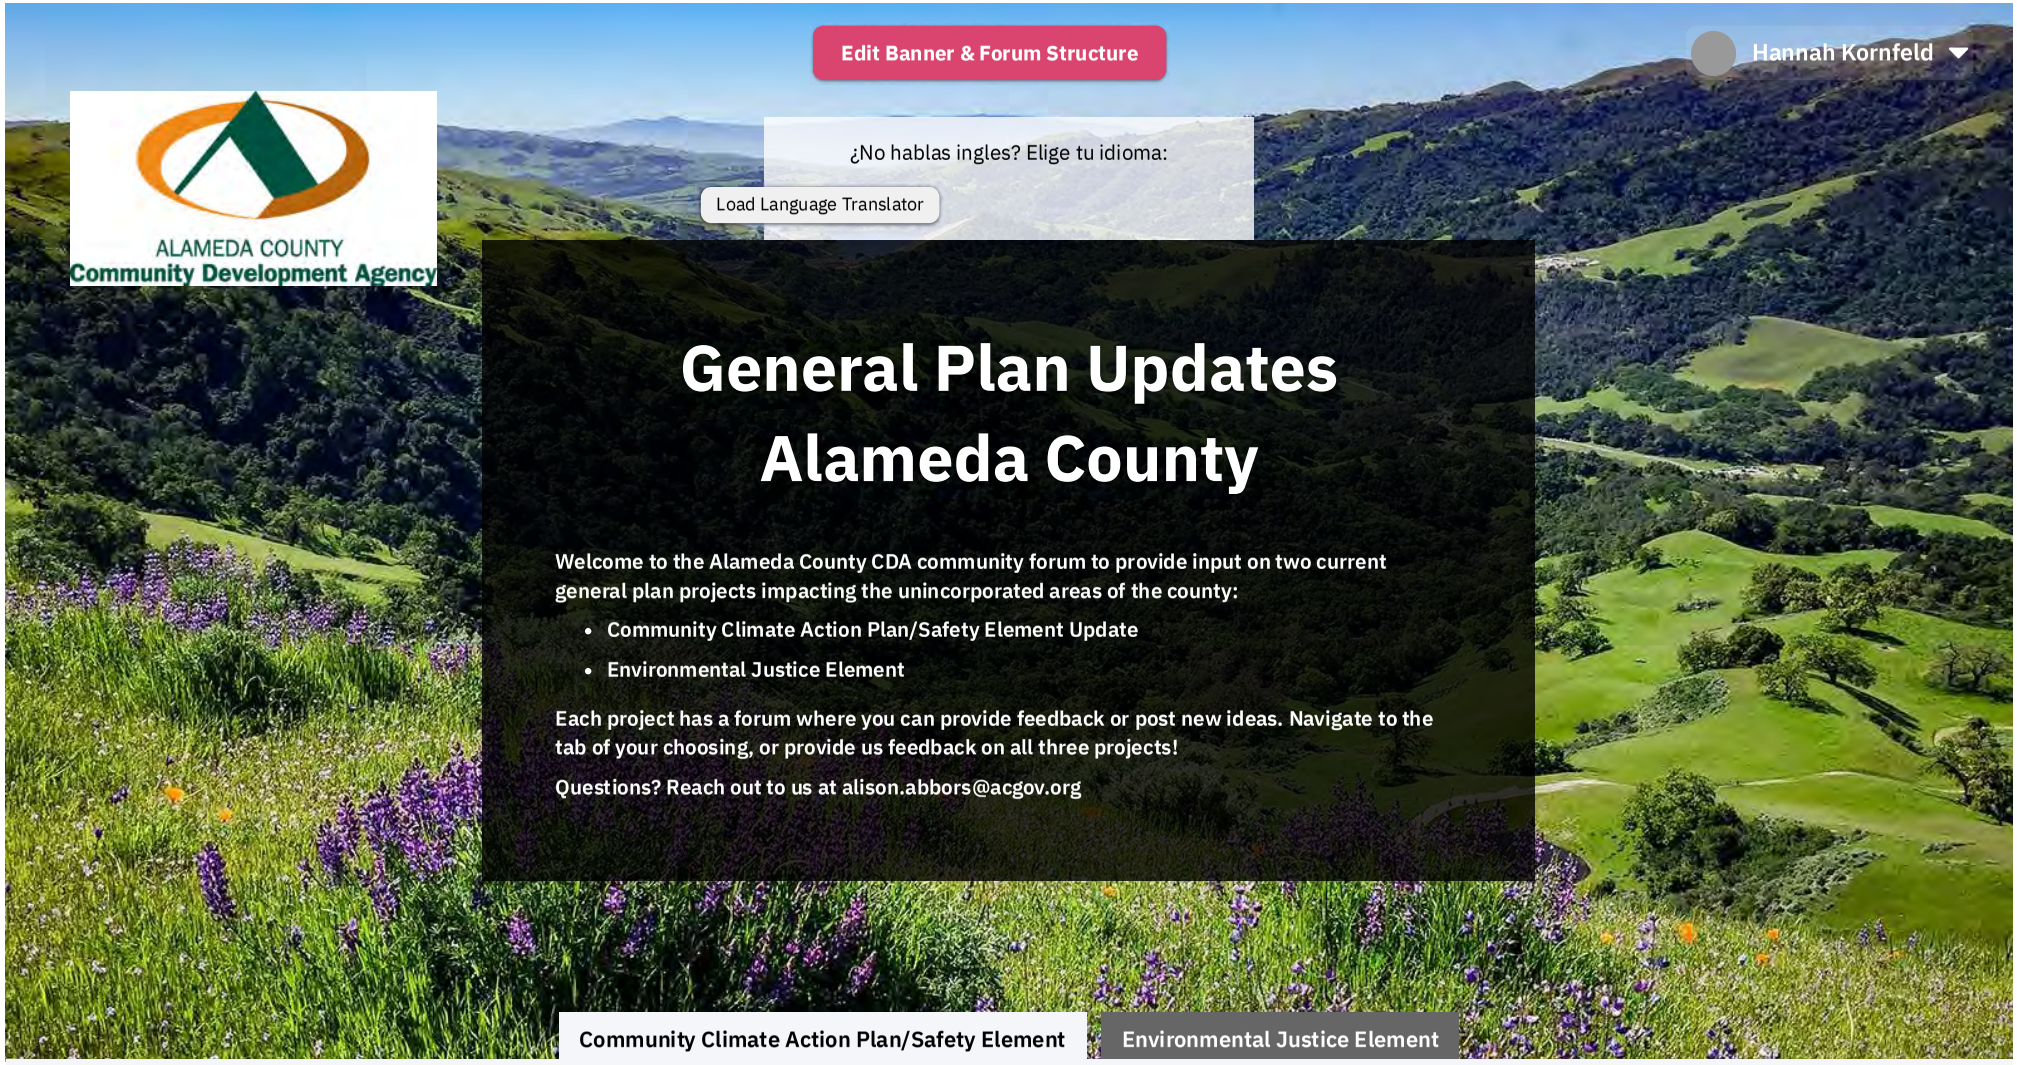
What is the timeline for this project?

You can view the project's timeline on the County's website: **acgov.org/cda/planning/ccapse.htm**

How can I participate in the process?

Sign up for periodic updates and announcements about upcoming events at the County's website. You can also provide feedback on the draft strategies to include in the CCAP through June 30 on the County's Consider.It website. Project information can be found by visiting **acgov.org/cda/planning/ccapse.htm** or scanning the QR code below!

Tell a friend, family member, or neighbor about this project so that we can develop a CCAP that is a reflection of our community. Thank you for taking the time to be part of the CCAP development process!



The forum host has frozen this forum so no changes can be made.

Do you want to learn more about local climate issues and actions? If you live or work in unincorporated Ashland, Castro Valley, Cherryland, Fairview, Hayward Acres, San Lorenzo, Sunol, or the unincorporated areas around Livermore, Pleasanton, or Dublin, Alameda County invites you to be part of the climate planning process. To support resilient, climate smart unincorporated communities, the County is in the process of updating its Community Climate Action Plan (CCAP) and Safety Element.

This platform provides proposed strategies for the CCAP. Take a moment to review the strategies, add your thoughts, or suggest new ideas!

For more information on this project, please visit the County's website: **https://www.acgov.org/cda/planning/ccapse.htm**
Join our listserv to receive email updates about this project.

Building Strategies

Which building strategies should be prioritized in the Alameda County Community Climate Action Plan?

sort: Trending ▾

All opinions | Just you | Custom view

Install additional renewable energy-generating technologies (e.g., solar panels) in residential and nonresidential buildings throughout the county.

4/26/2023 12 opinions 0 pros & cons

Connect owners/occupants of existing residential and nonresidential buildings to energy audit and weatherization programs and resources.

4/26/2023 9 opinions 0 pros & cons

Connect to external programs that provide low-cost financing and encourage energy efficiency investments for existing residential buildings.

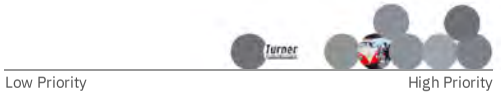
4/26/2023 9 opinions 0 pros & cons

Promote existing community education programs around energy efficiency best practices and cost savings opportunities, prioritizing outreach to disadvantaged communities.

4/26/2023 10 opinions 0 pros & cons

Retrofit existing residential and nonresidential buildings to improve energy efficiency.

4/26/2023 9 opinions 0 pros & cons



Improve resilience of residential and nonresidential buildings to climate hazards.

4/26/2023 7 opinions 0 pros & cons

Encourage the use of electricity and alternative fuels in construction equipment.

4/26/2023 6 opinions 0 pros & cons

Increase the use of low-carbon concrete and other types of sustainable materials in new construction and renovations.

4/27/2023 8 opinions 0 pros & cons

Reduce plug loads in residential and nonresidential buildings.

Plug loads refer to the energy used by equipment that is plugged into an outlet.

4/26/2023 9 opinions 0 pros & cons

Decarbonize residential and nonresidential buildings throughout the county.

This strategy would entail replacing fossil fuel (e.g., gas) infrastructure and appliances in buildings with electric alternatives.

4/21/2023 7 opinions 0 pros & cons

Infrastructure Strategies

Which infrastructure strategies should be prioritized in the Alameda County Community Climate Action Plan? Infrastructure refers to clean energy, electric vehicles, and other types of clean technologies.

sort: Trending

All opinions | Just you | Custom view

Increase broadband connectivity.

4/26/2023 7 opinions 0 pros & cons

Transition the community to 100% clean energy.

4/26/2023 7 opinions 0 pros & cons

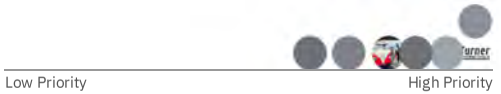
Support the development of innovative approaches to energy generation, distribution, and storage.

This strategy could include energy recapture (e.g., in-conduit hydro, co-generation), and developing clean microgrids for schools, hospitals, or

4/26/2023 7 opinions 0 pros & cons

Increase electric vehicle charging infrastructure.

4/26/2023 7 opinions 0 pros & cons



Increase the use of battery storage technologies (i.e., decentralized clean energy resources).

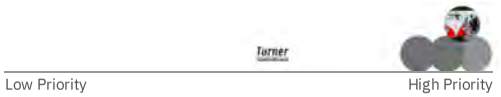
4/26/2023 6 opinions 0 pros & cons

Improve energy sector resilience.

4/26/2023 6 opinions 0 pros & cons

Increase the use of onsite greywater and harvested water.

4/26/2023 5 opinions 0 pros & cons



Increase the capture and use of recycled water.

4/26/2023 5 opinions 0 pros & cons

Encourage public electric and low-carbon vehicle adoption.

4/26/2023 5 opinions 0 pros & cons

Protect vulnerable transportation infrastructure, services, and systems from climate hazards.

4/26/2023 5 opinions 0 pros & cons

Evaluate the potential for and develop district energy systems in mixed-use and higher density areas of the county, and develop an implementation plan for cost-effective systems.

District energy systems include multi-building heating and cooling systems.

4/26/2023 5 opinions 0 pros & cons

Reduce water consumption for irrigation and landscaping.

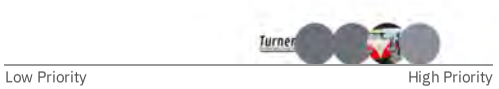
4/26/2023 5 opinions 0 pros & cons

Improve resilience of water and wastewater systems.

4/26/2023 5 opinions 0 pros & cons

Convert private vehicle fleets to electric vehicles and other low-carbon options.

4/26/2023 5 opinions 0 pros & cons



Transition to electric landscaping equipment.

4/26/2023 5 opinions 0 pros & cons

Encourage the installation of emergency backup generators for non-County-owned critical facilities and essential services, prioritizing solar-powered generators, where feasible.

4/26/2023 4 opinions 0 pros & cons

Reduce water consumption in buildings.

4/26/2023 5 opinions 0 pros & cons

Encourage the use of electric or alternatively fueled agricultural equipment.

4/26/2023 5 opinions 0 pros & cons

Land Use and Mobility Strategies

Which land use and mobility strategies should be prioritized in the Alameda County Community Climate Action Plan?

sort: Trending

All opinions | Just you | Custom view

provide this info before the meeting.

6/15/2023 3 opinions 0 pros & cons

Improve safety for pedestrians and cyclists.

4/26/2023 7 opinions 0 pros & cons

Develop and maintain a connected and continuous bicycle and pedestrian network.

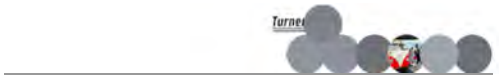
4/26/2023 7 opinions 0 pros & cons

Promote land uses that support walking and bicycling.

4/26/2023 6 opinions 0 pros & cons

Continue to partner with transit agencies to improve reliability and convenience of existing transit services through increased frequency, expanded service areas, extended service hours, and better facilities.

4/26/2023 8 opinions 0 pros & cons



Explore feasibility of solar canopies on parking lots.

4/26/2023 7 opinions 0 pros & cons

Increase jobs in urban areas of the county.

4/26/2023 7 opinions 0 pros & cons

Increase and improve access to walking and bicycling through support services.

4/26/2023 7 opinions 0 pros & cons

Consider establishing temporary and permanent car-free areas.

4/26/2023 7 opinions 0 pros & cons

Develop community awareness and education programs around shared mobility (e.g., car sharing, bike sharing, scooter sharing), prioritizing outreach to disadvantaged communities.

4/26/2023 7 opinions 0 pros & cons

Build community awareness of walking and biking as an alternative to driving, as well as an understanding of the safety responsibilities of all users.

4/26/2023 7 opinions 0 pros & cons

Increase residential density in urban areas of the county.

4/26/2023 7 opinions 0 pros & cons

Strategically evaluate the parking needs of the community and consider repurposing underutilized and vacant lots.

4/26/2023 6 opinions 0 pros & cons

Increase transit-oriented development.

4/26/2023 7 opinions 0 pros & cons

Enhance rideshare infrastructure and services to increase community participation.

4/26/2023 7 opinions 0 pros & cons

Increase affordable and below-market rate housing.

4/26/2023 7 opinions 0 pros & cons

Reduce minimum parking requirements for mixed-use and transit-oriented development.

4/26/2023 6 opinions 0 pros & cons

Waste Strategies

Which waste strategies should be prioritized in the Alameda County Community Climate Action Plan?

sort: Trending

All opinions | Just you | Custom view

Promote a circular economy.

4/27/2023 25 opinions 1 pro or con

Increase edible food recovery.

4/27/2023 23 opinions 0 pros & cons

Reduce solid waste generation.

4/27/2023 23 opinions 0 pros & cons

Reduce single-use plastics.

4/27/2023 26 opinions 0 pros & cons

Reduce the generation of construction and demolition waste.

4/27/2023 22 opinions 0 pros & cons

Continue to educate the community on composting best practices and increase use of curbside green organic recycling bins.

4/27/2023 23 opinions 0 pros & cons

Increase recycling in the unincorporated areas of the county.

4/27/2023 22 opinions 0 pros & cons

Health and Resiliency Strategies

Which health and resiliency strategies should be prioritized in the Alameda County Community Climate Action Plan?

sort: Trending

All opinions | Just you | Custom view

Support local food and improve food security.

4/27/2023 54 opinions 0 pros & cons

Ensure basic needs are met for vulnerable populations.

4/27/2023 54 opinions 0 pros & cons

Support the creation of resilience hubs and other place-based resilience resources to provide community members with essential services before, during, and after hazard events.

4/26/2023 54 opinions 0 pros & cons

Prioritize making emergency services more accessible, especially for vulnerable populations.

4/27/2023 54 opinions 0 pros & cons

Ensure that emergency services have adequate capacity to address increased demand due to potential impacts of climate hazards.

4/27/2023 54 opinions 0 pros & cons

Prioritize displacement avoidance of disadvantaged populations and small businesses.

4/27/2023 54 opinions 0 pros & cons

Build resilience to drought across the unincorporated county.

Note: (?) = the word was difficult to read, unsure if it is correct, xxx = illegible written text

Note: color coded by location of engagement

Buildings and Energy

- More trees, preserves ground water and protects shade/xxx
- Make at-home solar and battery storage more affordable
    - This was an example sticky that had “second” “third”, “fourth” and “fifth this” next to it
- Less factory waste
- AC use a lot of power
- About control not the earth
- Incentivize home upgrades like attic fans vs. AC to reduce energy use
- White roofs
- Use more wind or sun power
- Don’t leave water running
- Houses must have water or solar panels
    - Spanish: Casas deben de tener agua o maqnnas (?) de paneles, solares
- More solar energy
- Everyone should affordable solar
- Free solar panels
- Better access and rebates for multifam rentals (?) and solar battery storage
- Solar panels
- More gardens and parks
- Use electricity when needed
- More xxx low cost loans for energy upgrades
- That solar panels are xxx
    - Spanish: que los panels soles seas mas pejos (?)
- More ways for the bicycles
    - Spanish: mas vias para las bicicletas
- Shade trees at ea house
- More lectures about climate change, thanks

Transportation and Land Use

- Carpool
- Go EV

- More National Parks
- Edible “forests” fruits/nut trees for gleaning
- Improve safety on public transport cleanliness and make them more fun like food music events
- Less urban sprawl
- Electric cars use child labor for lithium mining
- Your electric car will zap you with EMPS
- Carpooling
- New construction should be accessible by public transit not just cars
- Stop flying
- Provide money incentives for people who regularly use public transit
- Provide incentives for small businesses that source products locally and reduce emissions related to transporting goals
    - There was an arrow pointing to the backside of this note
- Electric car chargers
- Kids that go to school should get on Bart for free
- Rental scooters and bikes to encourage less car use
- Electric vehicles = zero smog
- Bike lanes please
- Electric scooters
- Less pollution with cars
- I feel like when it comes to transportation and gas, you can maybe build a solar energy car, however when it is xxx you can put in xxx
- More trees and more water
    - Spanish: mas aboles y mas aqua
- It would be very good to put electric cars and trees
    - Seria muy bueno poner carnos electricos yinas arboles
- Shuttle from Bayfair BART to regional parks like Lake Chabot
- Check car for smog and license (?)
- Electricity from solar panels for cars
- Bike lanes (protected)
- More zoning for parks and walkability
- There is very little transportation for the children
    - Hay muy poca transportacion para los ninos
- Zero emissions vehicles
- I think kids (?) should get on bus for free
- Walk more
- Ride and bike
- Plant stuff and take care of them
- Reserve areas for nature instead of urbanizing everything

<u>Water and Waste</u>

- Take short showers
- Use less shower time
- Pick up litter you see

- Don't leave trash
- Invent a way where hot water immediately appears on tap
- Collect grey water at home and use toward plants
- Have a better recycling system
- Help clean up the ocean
- Reduce plastics
    - Spanish: reducir plasticos
- Recycled municipal water programs
- Produce less trash
- Less garbage
- Motivate people to put their garbage in its place, not on the street
    - Spanish: motirar a la gente a poner la basura en su lugar no en la calle
- Improve garbage, reduce garbage (?)
    - Spanish: Mejorar la basura, redusir la basura
- Cleaner
    - Spanish: mas limpio (?)
- Not wasting as much water
- Clean water
- Protect our intermittent creeks
- Less trash
    - Spanish: menos basura
- Less trash recycle
    - Spanish: menos basura reciclar
- Use reusable water bottle and other items
- Home composting
- Reuse creatively
- Plant water-wise gardens
- Trees and native plants
- Reuse clothing, no more fast fashion
- Ban plastic use and find alternatives
- Showers less than 5 minutes
- Plant more trees and a cleaner beauty without garbage in the streets
    - Spanish: sembrar mas arboles y una lindad (?) mas limpia sin basura en las calles

<u>Health and Equity</u>

- Increase lost tree canopy and save existing
- Stop war it pollutes the earth
- Stop using chemicals like RoundUp poison in cleaners
- Give everyone money for a house and food
- Restaurants with leftover food should donate/repurpose
- Have doctors and medical services more available weekends and nights (not business hours) for people who can't leave work
- Habitat loss = native garden, solar, creeks reduce flooding (?)
- Uplift needs of unincorporated areas in air quality conversations

- Cleaner air more gardens
- Cleaner water less air pollution don't trust government
- Stop wild fire
- Stop polluting the air
- Community farming
- More trees
    - Spanish: mas arboles
- In public areas put 3 different bins for garbage
- Women need more good jobs (?)
- Eco club from san leandro high school
- Do not use plastic supply
- More gardens
    - Spanish: mas jardines
- They should lower our rent
    - Spanish: que nos deben de bajar la renta
- Eat plant-based foods
- Help be healthy forever
- Go vegan
- Eat healthy
- Eat organic
