AB 109 Contracts Report - November

Description/Summary

Active RFPs

The allocation for the Family Reunification RFP is being combined with the following allocations: Kinship Reentry Workforce (\$250,000), Family Reunification: Therapy Services (\$400,000 of the allocation), Women/Mother's Services (\$250,000 of the allocation), and Fathers Services (\$250,000).

This Family Reunification program is intended to support Participants and their families as they transverse through and beyond their reentry journey by intentionally and simultaneously working to reunify Families, strengthen Family ties, heal Familial/generational wounds, increase positive childhood experiences, build resilience, increase healthy self-esteem, expand positive social networks, reduce external stresses and start Families on the path of building generational wealth. In many cases, reentering individuals require more personal support from their families and peers to connect and remain connected to stabilization services. The Probation Department recognizes that there are significant challenges for families and peers who provide support to our clients including enduring hardships themselves while lending this support. Helping the reentry population be successful requires training and financial support be provided to family members and peers who support them. To enhance the well-being of the entire family, this Program must expand across multiple service areas. To ensure expertise in each area, this Family Reunification (FR) Program has been broken up into six program areas:

1. Primary Family Reunification Provider & Referral Point (\$2,200,000)
2. Housing Stipend (\$1,800,000)
3. Family Counseling & Therapy Services (\$700,000)
4. Childcare, Navigation & Coordination (\$1,000,000)
5. Child Custody System Navigation Ally (\$150,000)
6. Elder Care Specialist (\$100,000)

RFPs in Development

The allocations for the Education and Career Technical Education RFPs are being combined to create a new RFP, Education and Career Technical Training Support (ECTTS) Program. The ECTTS program will offer extensive assistance to AB 109 eligible individuals by investing in their futures. This assistance encompasses a range of services such as financial support, program navigation assistance, barrier removal, mentorship, guidance, and establishing connections with workplaces with the goal of enhancing the likelihood of clients securing meaningful life goals in the education and employment spaces.

Evaluation Services of the AB 109 funded government partners and programs.

SOW in Development

The goal of the CRSP is to ensure all Clients have an opportunity to create a thorough and holistic reentry plan focused on their long-term success, and they are personally connected to coordinated services that meet their individual goals and needs laid out in their Plan. As a single-entry point for all Clients, CRSP is also intended to increase Client's awareness of services relevant to their needs and increase service coordination and utilization amongst Clients. Additionally, CRSP will enhance Alameda County Probation Department's data collection efforts and understanding of Client needs.

The allocations for Family Reunification: Legal Services and Clinics for Reentry Legal Barrier Removal are being combined to create a new RFP.

Funding for smaller organizations owned and operated by formerly incarcerated to ensure that when additional funding is released, the RFP targets the formerly incarcerated who own and/or operate businesses.

The FUBU program provides peer support and navigation to reconnect disengaged clients, enhance clients' intrinsic motivation and promote clients' successful reentry. Contractors assist with case management and connect clients to services such as employment, education, and substance use interventions. The program links clients to Peer Coaching and Mentoring, Leadership Development opportunities, Family Reunification, Life Skills Training and Cognitive Behavioral Therapy.

Residential Program that will have wrap-around services on site and help transition individuals from incarceration, to stability to community.

This line item is intended to acknowledge, provide support and build the capacity of those smaller organizations that are already doing the work, not for organizations to start a service.

Utilizing an evidence-based model for women's services. Program in development.

A CBO to serve as a subject-matter expert on TAY (18-25) services between the adult and juvenile service system.

Develop programming and a list of resources for the LGBTQ+ community.

The vision of restorative practices is to create a world where all people are cared about, valued, seen, and heard. Restorative practices are evidence-based processes that represent a lasting cultural shift, offering an approach to building safe and effective environments through positive relationships, connection, and accountability. Restorative Justice is about the interconnectivity of all of us – all CBO's and partners must work in collaboration – only then can we create the fundamental changes in people, in our relationships and in our communities.

Capacity building for smaller organizations (similar to the CCF) who are working with the reentry population but have never received County funding or very little, under \$100,000.

New Housing RFP to assist participants who are homeless or at risk of homelessness.

A Batterers' Intervention Program is a combination of education and counseling that focuses on the causes of domestic abuse, its effects on a victim; and any required changes that must occur to prevent it from happening again in the future.

A program to provide sex offender treatment and assessment services using the containment approach in the context of multi-agency collaboration, explicit policies, and consistent practices that combine case evaluation and risk assessment, sex offender treatment, and intense community surveillance, all designed specifically to maximize public safety.
