

Statement of facts By Michael Mann

This program, this opportunity is a diamond in the rough, after incarceration and while I was incarcerated I talked with a lot of inmates that wanted to change but felt hopeless due to limited opportunities this program gave me the opportunity that thousands of systems impacted individuals will never experience and because of the chance I have been given I get to see another side of life: like given to the community helping those that can not help themselves it's a new cycle an opportunity was given to me the key word is give and now I give back positively.

forever appreciative
